No. 1806

Introduced by Assembly Member Wolk

January 16, 2008

An act to add Chapter 4.5 (commencing with Section 1450) to Division 2 of the Fish and Game Code, and to ~~amend Section 1552 of, to add Section 12221 to, and to add Chapter 1.5 (commencing with Section 12210) to Part 4.5 of Division 6 of, the Water Code, relating~~ *add Section 12221 to the Water Code, relating* to resources.

LEGISLATIVE COUNSEL'S DIGEST

AB 1806, as amended, Wolk. Fishery—~~resources:~~ *resources:* *Sacramento-San Joaquin Delta.*

(1) Existing law authorizes the Department of Fish and Game to enter into various agreements with public and private entities for the protection, conservation, and management of fish and wildlife resources. The Natural Community Conservation Planning Act authorizes the department to enter into agreements with any person or public entity for the purpose of preparing a natural community conservation plan, to provide comprehensive management and conservation of multiple

wildlife species. The act requires a plan to identify and provide for those measures necessary to conserve and manage natural biological diversity within the plan area while allowing compatible and appropriate economic development, growth, and other human uses. Other existing law prohibits an entity from substantially diverting or obstructing the natural flow of, or substantially changing or using any material from the bed, channel, or bank of, any river, stream, or lake, or from depositing certain material where it may pass into any river, stream, or lake designated by the department, without first notifying the department of that activity, and entering into a lake or streambed alteration agreement, if required by the department to protect fish and wildlife resources.

This bill would require the department to prepare and implement a set of protocols to be used to evaluate the need for fish rescue and relocation plans and actions on behalf of the Sacramento-San Joaquin Delta fishery resources, and to guide the implementation of those actions. The bill would require the department to expedite the approval of any permit required from the department for implementation of fish rescue efforts on public lands.

~~(2) Under existing federal law, the United States Bureau of Reclamation operates the Central Valley Project and appropriates water for the beneficial uses of that project pursuant to permits granted by the State Water Resources Control Board and subject to specified state laws. The Department of Water Resources operates the State Water Resources Development System and appropriates water for that system pursuant to permits granted by the state board.~~

~~This bill would require the state board, based on a prescribed review which the state board would be required to undertake, to reopen and impose terms and conditions on water rights permits for the state system and the federal project with regard to the delta that provide reasonable mitigation for both direct and indirect adverse impacts on delta fishery resources arising from the operation of the water export facilities of the state system and the federal project. The bill would require the state board to report to the Legislature on the implementation of those requirements by January 1, 2010. The state board would be required to incorporate the costs of implementing this provision into the calculation of specified water use fees.~~

(2) Under existing law, various state agencies administer programs relating to water supply, water quality, flood management, natural

resource preservation, and recreation in the Sacramento-San Joaquin Delta.

This bill would deem to be capitalized all statutory references or references in state government documents to the Sacramento-San Joaquin Delta, without regard to whether “Sacramento-San Joaquin” is included in that reference.

Vote: majority. Appropriation: no. Fiscal committee: yes.
State-mandated local program: no.
